             Sacramento County Department of Airports

Subject: Addendum #2 – RFP for a Parking Access and Revenue Control System at Sacramento International Airport

This addendum provides responses to five (5) additional questions related to the Request for Proposals (RFP) referenced in the subject line. Listed in Attachment 1 are the questions received and the Department's responses. The questions listed are in the exact format received by the Department, with no corrections made for spelling or grammar.

Kind Regards,

Michael Winans, C.M.
Airport Economic Development Specialist

  1   – Questions and Responses

ATTACHMENT 1

QUESTIONS AND RESPONSES

#	Question or Request	Response
1	Regarding the FAT test – How many Airport personnel will be attending the FAT test at our factory?	The Department anticipates approximately 4 - 6 attendees at any given time depending on availability and functionality being tested.
2	Regarding storage – Will the airport provide on-site storage for the required equipment?	Refer to Exhibit A, Section M - Delivery, Storage, and Handling of the sample agreement.
3	RFP due date – Realize this has been asked and answered but asking one last time. Can RFP due date be revised to Friday the 26th? It's a 3 day extension but it gives a bit more time to get concise information from a couple of key vendors. This would not alter the Airport review and selection schedule.	The Department does not anticipate amending the proposal due date.
4	Please confirm any required network switches in the lane or POF are to be supplied by the PARCS vendor.	Required network switches in the lane and POF are to be supplied by the PARCS vendor.
5	Please confirm the airport will supply any required SFPs in the aggregation/distribution switches they are providing for the PARCS network(i.e. the uplinks from the PARCS equipment).	The Department's network team will provide the SFPs on its own switches, the selected proposer will provide SFPs on their switches.
